

Control healthcare costs. Improve member lives.

Do powerful things with your data.

Lockbox,™ our benefits data enablement platform, gives you the control, visibility, and agility to easily harness the full potential of your healthcare and benefits data.

With Lockbox you can now control when, where and what data flows across your ecosystem, placing your benefits teams at the center of all data decisions. Benefit leaders can quickly add or securely share data to make near real-time benefits decisions.

Utilize

and control your data any way you want.

Share

the right data only with the right people at the right time.

Enable

deep data insights that drive innovation.

Evaluate

how individual vendors impact your ecosystem.

Analyze

the efficacy of new drugs and health programs.

Lockbox takes you beyond the limits of vendor silos, data warehouses and costly consultants by giving you all the data access and tools you need to proactively manage complex benefits programs, reduce skyrocketing healthcare costs, and deliver better member outcomes.

Abett is leading the healthcare benefits data revolution:

\$12B

Healthcare plan spend managed

1M+

Employee lives covered

\$30M+

Money saved in last 36 months

Why you need to take control of your data

Traditional data warehouse solutions don't allow you the flexibility, visibility and agility needed to take full advantage of deep data insights:

Poor data visibility and control inhibits program success

Data fragmentation dramatically increases your fiduciary risk

Limited data transparency reduces vendor accountability

Lack of trusted data insights is making your benefit decisions harder

Whether you're a CFO, CHRO, VP of Benefits or Total Rewards Director, Lockbox takes your strategic decision making to the next level:

Enable your data to better meet your unique needs

- **Analyze claims data**, member demographics, and market trends to optimize plans and costs
- **Model the impact of targeted interventions** on specific populations and vendor selection on costs
- **Evaluate the effectiveness** of different benefits via data-driven insights and value-based decision support

Independently analyze vendor performance

- **Utilize data analytics** to evaluate performance and select vendors that deliver the best value and outcomes
- **Use independent vendor scorecards** to individually track vendor performance
- **Onboard/offboard vendors quickly** with a streamlined data process that sets up SFTP transfers in minutes

Navigate fiduciary risk with data you can trust

- **Get comprehensive reporting** that uncovers hidden costs, tracks fees, and ensures contracts are structured for maximum value
- **Protect sensitive member data** and ensure compliance with privacy and healthcare regulations such as HIPAA and CCA
- **Create customized reports in days**, not weeks, without relying on third-party consultants

Tailor specialty plan designs to maximize outcomes

- **Model benefit plan changes**, design support and guidance plans for members with chronic conditions or cancer
- **Develop custom programs** tailored to specific populations and health conditions
- **Utilize data analytics** to identify high-risk populations and design programs that address their unique needs
